DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-49, drawn to the compounds and compositions of formula I wherein Y is N, X is carbon, classified in class 546, subclass 114.
 - II. Claims 1-14, drawn to the compounds and compositions of formula I wherein Y is carbon, X is N, classified in class 546, subclass 114.
 - III. Claims 1-14, drawn to the compounds and compositions of formula I wherein Y is N, X is N, classified in class 544, subclass 253.
 - IV. Claims 50-68, drawn to the methods of using the compounds, classified in class 514, subclass 299.

The inventions are distinct, each from the other because of the following reasons:

Groups I-III are directed to structurally dissimilar compounds such that the variable core created by varying the definitions of X and Y do not belong to a recognized class of chemical compounds in the art, and references anticipating one invention would not render obvious the others, for example, thienopyridine is different from thienopyrimidine. Thus, separate searches in the literature as well as in the U.S. Patent Clarification System would be required. Each group's compounds are made and used independently of each other and could support separate patents. The compounds differ significantly in chemical structures. One skilled in the art would not

Art Unit: 1624

consider such diverse structures as functional equivalents of each other. The mere fact that there is a single similarity is not in itself a significant reason to render the whole embodiment obvious.

2. Inventions I-III and IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case more than one use exists for compounds of Groups I-III as evidenced by claims 50-68 drawn to a variety of diverse uses. Additionally, the various uses would raise issues of enablement separate from that of the compound claims and would require art-recognized evidence that activity relied on its reasonably correlated to in vivo efficacy for the uses claimed.

A telephone call was made to Mr. Adriang Looney on 07/15/02 to request an oral election to the above restriction requirement, but did not result in an election being made

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
